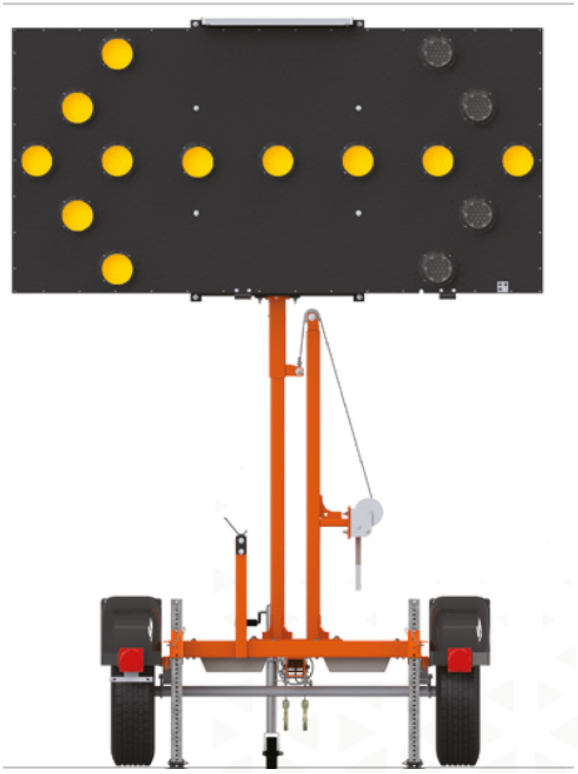
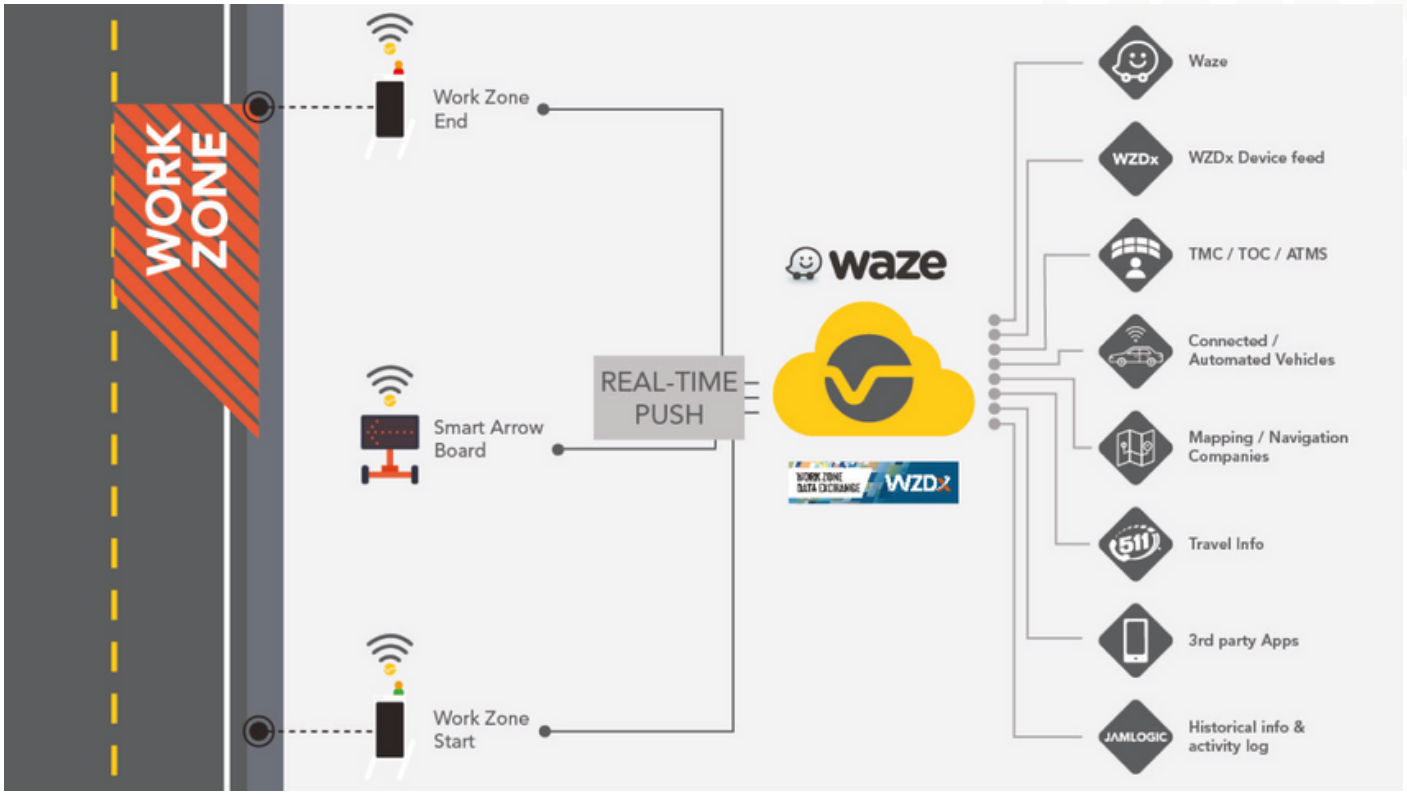
SMART ARROW BOARD



The Smart Arrow Board is a connected device that provides real-time key lane closure information to motorists, government agencies and operations managers.
Short-term lane closures are set up on highways every day, impacting traffic and motorists' commute. The Smart Arrow Board enables operations managers and government agencies to be proactive instead of reactive when it comes to identifying unexpected lane closures.
The Smart Arrow Board pushes lane closure information through Waze to inform motorists before they reach an active work zone. Drivers can then navigate more safely or choose an alternative route, improving circulation around your operations.



SMART ARROW BOARD

VER-MAC RETROFIT KIT

- Install on any manufacturer's arrow board
- Plug and play setup
- Real-time Waze integration
- Map and list view in JamLogic

SMART ARROW BOARD FEATURES
